WORK EXPERIENCE

Software Developer
Rubixx

03/2023 - Present *Stafford, England*

Rubixx is a UK-based company specialising in providing cloud services to organisations in the social housing sector.

Achievements/Tasks

- Implementing SOLID principles and various Design Patterns to ensure quality of code is to the highest standard.
- Refactored a large module riddled with bugs and wrote unit tests to ensure its reliability.
- Took the initiative and revamped the interface of the most popular module in the system among customers with huge success.
- Undertaken responsibilities as a Product Owner, becoming a domain expert and liaising with customers.
- Implemented SQL queries to rectify bad live data on multiple occasions
- Implementing RESTful APIs to improve data communication and integration within the organisation's cloud services.
- Utilising Azure DevOps for efficient project management, CI/CD, and version control to streamline development processes.

DfE Software Engineering Bootcamp
Hyperion Dev

12/2022 - 03/2023 *Online*

HyperionDev is southern Africa's largest tech education provider. Its main goal is technical education for anyone who wants to learn programming.

Achievements/Tasks

- Learned and applied OOP skills to make a local email messaging system that creates, searches and filters through emails
- Set up virtual environments and created a website using the Django framework
- Created a CRUD app using Python and SQL as a backend

IT Technician
Skyline IT

09/2019 - 07/2021

Achievements/Tasks

- Maintained office PCs, networks, and mobile devices.
- Set up PCs, projectors, and microphones for use in video conferencing rooms.
- Trained users on how to operate components and systems.
- Provided basic end-user troubleshooting and desktop support.

Contact : Tahir Hussain

TECHNICAL SKILLS

.NET Core C# Backend DevOps

REST APIs SOLID TypeScript

JavaScript (ES6+) Responsive Design

Tailwind CSS React SQL

PERSONAL PROJECTS

E-Commerce Fashion Website (10/2022 - 11/2022)

- Based on a business my wife would like to start. I built a dummy full-stack e-commerce fashion site. Given the scale of the project, I was required to learn and apply tools such as Redux , TailwindCSS , and Typescript . The website features various types of products, product pages, a shopping cart a checkout system, and user authentication.

Back-end API (Flask/Python) (02/2022 - 03/2023)

- Client needed a front-end app to access data from a Google Sheet and use it as required
- Wrote a back-end API using Flask and deployed it to G-Cloud as a server
- Connected the front end to the API and formatted the data according to the client's needs

RPG Game App (07/2022)

- Inspired by my love for RPG's I decided to build one from scratch. This game features four playable characters (including myself!), a leveling-up system, and a nine-level roadmap with progressively difficult enemies

CERTIFICATES / EDUCATION

Hyperion Dev - Software Engineering (12/2022 - Present)

Approximately 150 hours of studying, practising and completing tasks. Technologies learnt range from Python to Django and SQL

Scrimba Frontend Career Path (03/2022 - 10/2022)

Approximately 150 hours of studying, practicing and completing lessons starting from the basics to learning how to make full scale applications in React.

Frontend Development Libraries (10/2022 - 12/2022)

Developer certification representing approximately 300 hours of coursework.
